Is smart something you're born with?

Genius isn't a birthright. It's a habit you can train.

WHY PRACTICE DUMB IDEAS ONLY?

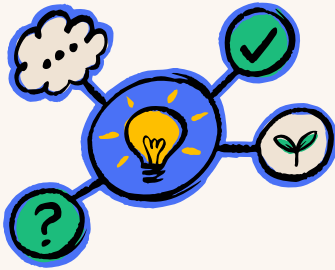

Eliminates Social Pressure

Your ideas will be less novel and original if you are under social pressure to be “right.” How can you be “right” when there is no right answer? **Deferring Judgement** is a skill that needs to be **taught** and **practiced**, which you can do by sharing only dumb ideas.

Practice the Power of “Yet.”

All promising ideas come with problems. No ideas are born perfect. When ideating for real, students need to learn to look for **promising but imperfect** ideas, and then to solve those problems **later**. Dumb Ideas helps us learn to consider all ideas, even when they may have problems.

Fluency, Flexibility, Originality

Idea generation is measured in **fluency**, **flexibility**, and **originality**. Generating Dumb Ideas is a teaching opportunity to help students learn to increase all three areas without the stakes of a real-life problem.

To do this really well: Understand the neuroscience behind convergent thinking and divergent thinking, and how the neural networks involved in fitting in inhibit divergent thinking. When students learn and **practice** the problem-solving **systems** in Activate your Genius Mode, they become better **innovators**, **collaborators**, and **problem-solvers**.
